

FOR IMMEDIATE RELEASE

Reintroduction of UFHV Series - Fast Axial Lead High Voltage Diodes

August 24, 2016 – Addison, TX - Dean Technology, Inc., today announced the reintroduction of the UFHV series axial lead high voltage diodes. This series of diodes are available in 2,000, 3,000 and 4,000 volt ratings and all have a 75 nanosecond response time.

While these products have been in continuous production, difficulties in the manufacturing process made them less economical to produce than other similar products, causing Dean Technology to stop publishing them as standard parts and decreasing their availability. Recent improvements in manufacturing processes have made this series of diodes a viable offering again.

“Dean Technology does everything possible to avoid discontinuing any product,” said Pedro H. Gonzalez, Technical Product Manager for the HVCA product line. “The work we’ve done to keep the UFHV series cost effective is a perfect example of our commitment. We want to be sure that we offer our customers products that will meet their needs for a very long time.”

With current ratings ranging from 350 to 550 milliamps, the UFHV series is very flexible and ideal for many uses. These diodes offer exceptional performance for the price, making them a very good value. Full product details can be found on the Dean Technology website, and the diodes are in stock and immediately available from Dean Technology, or through any approved sales partner or distributor.

About Dean Technology, Inc.

Dean Technology, Inc. (www.deantechnology.com) specializes in the manufacture, distribution and support of high voltage components, assemblies and power supplies. Its three main product lines include HV Component Associates (HVCA), CKE, and High Voltage Power Solutions (HVPSI). The HVCA line of products centers on high voltage diodes, rectifiers, bridge rectifiers, ceramic disk capacitors, and custom assemblies for specific applications. CKE products are a leading line of high voltage and high power silicon rectifiers, MOVs, selenium suppressors, silicon carbide varistors, as well as custom assemblies. The HVPSI product line includes high voltage power supplies, multipliers and test equipment. Dean Technology’s full family of products provides complete coverage of high voltage and high current solutions for any application. For sales and technical information Dean Technology can be reached at +1.972.248.7691.
